

WASHED TURF SPECIFICATION SHEET

DETAILS

All turf grades are available as washed turf.

The soil is carefully removed by a highly specialised washing plant to leave the grass sward as a clean uniform root mat.

The soil-less turf enables rapid root development with increased root biomass and lateral growth.

Washed turf offers increased percolation and the fast downward movement of water away from the surface, avoiding possible contamination of specialist rootzones.

Washed turf is used for sports pitches, cricket outfield, golf greens and tees.

Soil types	Soil-less
Suitability: General	High quality landscape Shaded areas Short-cut hardwearing areas Steep gradients
Suitability: Sport	Bowling greens Equestrian areas Football pitches Golf course greens Golf course tees Racecourses Rugby pitches Tennis courts

Established washed turf

Support Services	Contract growing Delivery (own fleet) Installation
